

# *FRIK-1*

FORD IGNITION SWITCH REPAIR KIT

PATENT PENDING

*Suits:*

***BA-BF FALCON***

***SX-SY TERRITORY***

# PURPOSE

The purpose of this kit is to provide an alternative to replacing the steering column on;

**Ford Falcon** and **Territory** vehicles

(made between late 2002- late2007).

-Approximately **441,923** were sold in Australia alone.

Until present the only solutions available were;

- Fitting an expensive superseded column or
- Fitting a second hand column that will eventually fail.

The **FRK-1** method benefits;

- Keep your original key (No key programming or different keys)
- Cost effective and easy to install.
- The **FRK-1** repair was tested to **10,000+** ignition cycles without fail or signs of wear.

PATENT PENDING

**The two common problems with these vehicles are;**

1. Electrical switch dislodgement from steering housing.  
- Symptom,  
Nothing happens when the key is turned in the ignition
2. The key does not return from the START position.

**This kit solves both problems!**

PATENT PENDING

**Tested over 10,000+ Ignition cycles**

# CONTENTS

**FRK-1 kit** contains:

- Specialised parts needed to complete the repair
- 9 minute video demonstration with step by step instructions
- 13 page printable PDF with in depth procedures and photo's.

**Note:** Some basic workshop tools required

Battery drill, Hand tools etc.

## DISCLAIMER

You will need a prior understanding of how to remove and re-fit the steering column to the vehicle and understand and carry out the correct safety procedures involved in airbag removal and installation. You may also need the correct licensing to undergo motor vehicle repair.
